Slim & Lightweight Cabinet Design

The LMEA series features a slim cabinet design with a thickness of 30 mm and a weight of 3.9 kg. Its compact and lightweight structure supports flexible installation across various environments.

Accurate Colors as Intended

Leveraging COB LED technology, the LMEA series delivers precise color reproduction, enabling smooth motion and consistent image quality across diverse content.

Energy Efficiency with COB LED Technology

The LMEA series adopts COB-based LED technology, which consumes approximately 50% less power compared to the SMD-based model. In addition, the COB structure generates less heat, contributing to stable performance and lifespan.

* Based on internal measurements, LMEA012 consumes 272 watts/m², while LSCC012 consumes 553 watts/m²; actual performance may vary depending on settings, usage, and environment.

Optimized Installation with Large Module Configuration

Compared to products that require 6 to 8 modules per cabinet, LMEA series uses larger-sized modules, reducing the number to just four per cabinet. This design helps shorten installation time and enhances screen flatness by minimizing gaps between units.

Enhanced Visual Quality through HDR

The LMEA series supports HDR10 and HDR10 Pro* content and features a contrast ratio of 20,000:1, enabling detailed expression in both dark and bright areas.

* HDR10 Pro is LG's own HDR solution to process HDR signal by using enhanced dynamic tone mapping.

Compatibility with LG Software Solutions

When connected with LG's CVHA system controller, the LMEA series is compatible with LG software solutions including LG SuperSign CMS, LG LED Assistant, and LG ConnectedCare, which help customers operate their own business deftly.

* The availability of the LG ConnectedCare and LG SuperSign CMS differs by region, and it needs to be purchased separately. So please contact the LG sales representative in your region for more details.

* The items that can be monitored by LG ConnectedCare : LG webOS System Controller (Temp., Signal Status, FPGA Ver, Ethernet Connection Status), Receiving Card (Temp., LED Power)
